

Java

```
class Solution {
    public long minCost(int[] nums, int[] cost) {

    }
}
```

JavaScript

```
/**
 * @param {number[]} nums
 * @param {number[]} cost
 * @return {number}
 */
var minCost = function(nums, cost) {

};
```

C++

```
class Solution {
public:
    long long minCost(vector<int>& nums, vector<int>& cost) {

    }
};
```

C#

```
public class Solution {
    public long MinCost(int[] nums, int[] cost) {

    }
}
```
